

We are happy to announce the second SESAME Net newsletter. Find out more about SESAME Network and its' members. Enjoy reading the following articles about HPC and the benefits of involving our network!

Are you an SME member? Come and join the growing Network - new members are very welcome! Start your journey in a growing community, which is using HPC benefits, sharing experiences and participating in development of new approaches. Join online at <https://sesamenet.eu/application-form-membership/> or contact us for a membership form at info@sesamenet.eu.

Sesame Network wishes you a high performance summer!

Sesame NET

13 HPC centers
13 countries
40 HPC systems
4.34 PF Linpack Performance
60 PB Storage

Upcoming Events

July 25 - 30

[120th European Study Group with Industry](#)

September 12 - 13

[BeneLearn 2016: Machine learning and Big Data](#)

September 19 - 24

[CFD with OpenFAOM®](#)

September 28 - October 1

[Digital Infrastructures for Research 2016](#)

October 24 - 26

[Training "Introduction to GPU programming using OpenACC"](#)

November 3 - 5

[Scientific Visualization](#)

What has happened so far?

The objectives of SESAME Net are to promote the take-up of HPC related technologies by SMEs and extend the network across Europe. Partners have been taking every opportunity to raise awareness and inform the wider community.

Over ten events took place during the period February - May 2016 from workshops, webinars, conferences and other exciting events.

What SESAME Net offers...

SESAME Net is a network founded by various HPC Centers to promote access to HPC expertise anywhere in the European Union, to introduce High Performance Computing (HPC) services into SMEs value creation and enabling the dissemination of "best practices" in HPC.

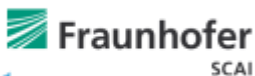

But what does that mean? What is offered? What can that do for you?

Partner-Report - Meet SESAME Net

The Partner Report is a multi-part reportage to introduce our network members. Each newsletter will showcase some of our partners, and highlight some of their most recent activities. This edition will feature Ruđer Bošković Institute from Croatia, Fraunhofer SCAI from Germany and the Irish Centre for High-End Computing ICHEC from Ireland.

HPC-SME-Success Story

Use Cases and success stories are a powerful tool to illustrate how companies from different areas of business can benefit from HPC technologies. In this newsletter, we present and describe the cooperation between IT4Innovation's and BORCAD, a producer of railway and medical technologies.
