HPC-SME-Success Story

Bekaert is a world market and technology leader in steel wire transformation and coating technologies. Headquartered in Flanders, it is a global company with almost 30.000 employees worldwide. Bekaert is a prime supplier of steel cord products for tire reinforcement and steel fiber for concrete reinforcements. But it offers a very wide range of advanced steel wire products for other applications to many sectors.

For several of its steel wire transformation processes, Bekaert relies on supercomputing...

SESAME Net officially launches the HPC4SME Assessment Tool

After significant developments over the last few months, many improvements have been integrated into the Assessment Tool, which is now available for all SMEs across Europe. For the first time, SMEs will have the opportunity to evaluate their potential to use HPC in cloud, both now and in the future, as well as to benchmark themselves against others.
